

FIELD SERVICE TECHNICIAN – WATER OPERATOR

PWBS (Paules Wetside Boiler Services Ltd.) is a Drinking Water Authority and has been in operation for over 35 years. It is our responsibility to promote the intent of the Safe Drinking Water Act. The act recognizes that all people in the province of Ontario are entitled to expect their drinking water to be safe. We work to meet that end through following government regulations, and by working on an ongoing basis to implement best practices both for our clients and our company. As well as operating small drinking water systems, PWBS operators are licensed under O. Reg. 170/03, 319/08 and 243/07 and offer a wide range of services including upgrading and maintaining drinking water systems, both commercial and residential.

Scope

The Field Service Technician is responsible for sampling and routine maintenance of small drinking water systems. Working independently in the field, you will be provided with a company vehicle to service various clients across Southern Ontario. This position involves drawing water samples according to the required regulation, conducting water system checks, changing filters, and maintaining equipment according to the required regulation and Engineering Evaluation Reports. Providing these services to owners and operators of small drinking water systems will result in maintaining safe drinking water and ensures that the client meets regulatory requirements and water sampling schedules.

The Field Service Technician will be required to become licenced as a Small Drinking Water Operator and will be supported in keeping abreast of current industry best practices to maintain current understanding of professional practices, standards, and latest developments. PWBS encourages continuous development and performance reviews are utilized in the interest of identifying specific individual development needs.

Duties & Responsibilities

- Collect water samples and conduct field testing
- Maintain and repair existing small drinking water systems (UV units, RO systems, water softeners, etc.)
